

Dear parent,

We are using a program called XtraMath to increase speed and accuracy in arithmetic. Your child is invited to spend a few minutes each day practicing math on a computer, tablet, or phone. If you would like to do XtraMath on a tablet or smartphone, look for XtraMath in the app store. The app costs \$5. On a laptop or desktop computer, he/she can do XtraMath for free at [xtramath.org](http://xtramath.org).

Here's what you need to do: In the app or on the website, select Enroll. Enter your email address and the code 6381. This will (1) create a parent account for you if you don't have one.

For more information about XtraMath watch the videos on their website, [xtramath.org](http://xtramath.org). Think of XtraMath as a math vitamin! For best results, XtraMath should be accessed once per day as regularly as possible. It only takes a few minutes so make it a part of your daily routine. Math facts are the building blocks of your child's math education and your child will be well rewarded for the time they spend practicing on XtraMath. Once your child has received the four certificates your child has finished their summer work. Please note not all certificates do not have to be achieved by school time. It is the process and repetition that will improve your child's skills.

Thank you! Mrs. Fuller
